Graduate School of Media and Governance Keio University **International Program** for Environmental Innovators

Learning to Design a Sustainable Future

Features

How to

Enter

The program unites a cross section of fields from urban planning and architecture, to policy design, social entrepreneurialism, and information technology. Our intent is to find solutions to environmental issues that unite private profit with the public good.

Objective

The chief ambition of the environmental innovator program is to train world-class environmental leaders who are able to tackle the dual problems of climate change mitigation and adaptation.
