

Integrating adaptation needs in REDD+ sub-national schemes

The event will focus on forest ecosystems' crucial role in adaptation and mitigation. We will present approaches to integrate adaptation into REDD+ sub-national initiative, and results of regional climate models and impact assessment factored in into the design and implementation of a REDD+ program.

Provisionary agenda:

- Opening (Sharon Gomez, GAF AG)
- Combining Mitigation and Adaptation needs in a subnational REDD+ Environment (Joerg Seifert-Granzin, FAN Bolivia)
- Projecting forest resilience and fire risks in tropical dry forests (Natalia Calderon Angeleri, FAN Bolivia)
- New remote sensing technologies to support forest monitoring under UNFCCC (N.N. , GAF AG)
- Adaptation and mitigation aspects of mangrove re-establishment (Eveline Trines, Silvestrum)
- Protecting Mangroves for Climate Change Mitigation and Adaption: A call to action (Winnie Lau, Forest Trends)

When and Where?

December 1st, 20:15, Room Mamey at Cancunmesse
