Navigating the post-Kyoto landscape : Madagascar's movement towards a national REDD strategy

Monday 8 december 2008, 18:00 – 19:30

White-tailed-eagle

Having reduced deforestation over the last 15 years, the country is developing methods for estimating reference emission levels and engaging stakeholders to improve forestry governance and ensure transparency in distribution of co-benefits

- 1. Achieving multiple benefits : the Government of Madagascar's vision for forests :**
(Mrs Lydie RAHARIMANIRAKA, Director of Natural Resource Valorization, Directorate General of Environment and Forests)
- 2. Protected areas as tools for addressing climate change and improving human livelihoods : a national perspective** (Dr James MacKINNON, Senior Technical Director, Conservation International Madagascar)
- 3. Protected areas as tools for addressing climate change and improving human livelihoods : a case study** (Dr Christopher HOLMES, Technical Director, Wildlife Conservation Society Madagascar)
- 4. Reducing deforestation outside of protected areas : developing a REDD-FORECA methodology**
(Mrs Monique RADIHARISOA ANDRIAMANANORO, Executive Secretary, REDD-FORECA project)
- 5. Towards a National REDD strategy : Madagascar's progress** (Mr Jean Roger RAKOTOARIJAONA, Director of Environmental Information, National Environment Office)
