

CO₂

as trees can remove greenhouse gas...

An underwater photograph of a diver in a dark blue environment, surrounded by green seaweed. The diver is wearing a headlamp and is positioned in the lower center of the frame. A large, white, stylized 'CO2' is superimposed over the center of the image. A red, branching seaweed-like structure is placed over the 'C', and a green leaf is placed over the first 'O'.

CO₂

...seaweeds can remove greenhouse gas, too.

as trees can be made **into paper...**

seaweeds can be made into paper...
