Cooperation:

 **unesco**

Support:

 **bioconexão
urbana**
a natureza é a solução

 **ANAMMA**
ASSOCIAÇÃO NACIONAL DE MUNICÍPIOS E MEIO AMBIENTE

ADAPTATION

69%

Know someone or have been already affected by climate change*

***45%** heavy rain or storm

Among the affected people

65% had financial loss

The average loss is

us\$1,740

64% is afraid when the forecast shows heavy rain in their region

76% believe that the structure of their cities is not ready for heavy rain, storm or flood

78% say that housing in risk areas for flood is increasing

86% realize that the green areas of their cities are decreasing

People are ready to change their habits

19% are willing to promote some habit changes, but don't know what can be done!

Nature-based Solutions

Actions that use natural resources to solve human challenges, bringing environmental, social and economical benefits.

Some NBS examples are urban parks, rain gardens that help absorb rainwater avoiding flood, green roofs to reduce internal temperatures, among others.

More than 90% of the population want to see NBS in their cities!

98% Tree-lined streets

native trees that help reduce heat waves and bring thermal, visual and acoustic comfort and parks, forest or big public green areas, which allow water infiltration when there is heavy rain

95% Filter gardens

to treat polluted water through plants

95% Green corridors

areas with vegetation along streets or rivers

95% Rain gardens

to retain rainwater, reducing flood

95% Green preserved areas

areas along riverbanks, lakes, slopes and mangroves

91% Rivers and lakes interconnected to urban environment

which help retain water when there is heavy rain

**In general, the NBS
mentioned had more
than 90% of acceptance**

More than 95% of the population believe NBS can reduce the impact of climate change!

rain garden

green roof

94% consider it important for a **politician** to present **NBS related proposals**

Shall we lead the Cities of the Future?
