# TERI Side Event COP-14, Poznań, Poland

## Low Carbon Pathways Challenges and Technological Options for India

Can India move from the projected 7 billion tonnes of CO<sub>2</sub> emissions to < 2 billion tonnes of CO<sub>2</sub> emissions in 2031?

To get the answer to this question and to explore the role that the international community needs to play in helping India keep the growth rate of GHG emissions in check, please join us at TERI side event on

**Tuesday, 09 December 2008**

**Venue: Aesculapian Snake room**

**Time: 18:00–19:30 hrs**

For confirmation and more details, please contact Mr Prabhat Upadhyaya at [prabhat@teri.res.in](mailto:prabhat@teri.res.in) or drop in at the TERI exhibition at C 15.

We look forward to see you at the venue. Refreshments will follow the event.
