

## Long-term Strategies in the International Political Context

20 June 13:15-14:45, Room Bonn

*Jointly organised by UNFCCC and 2050 Pathways Platform*

### DESCRIPTION

Long-term low-emission development strategies (LTS) are increasingly seen as a metric for national climate ambition as a growing number of countries and non-state actors come forward with their 2050 plans. LTS will feature in key political moments in 2019, from the G7 Leaders' Summit to the UN Secretary General's Climate Summit to the pre-COP and COP.

This panel discussion will bring together representatives from the leads of some of these major international events. Participants will frame the current global status of long-term strategies and give insight into their national processes for setting long-term goals.

### AGENDA

13:15-13:25	Introduction: <b>Richard Baron</b> , Executive Director 2050 Pathways Platform (moderator)
13:25-13:35	<b>Martin Frick</b> , Senior Director Policy and Programme Coordination, UNFCCC
