

## Unlocking progress on REDD+ through strengthening sector coordination

.....  
Emily Brickell, Senior Research Officer

3<sup>rd</sup> December 2012

---

## Making REDD+ cross-sectoral

Forests AND drivers of  
deforestation contribute  
to development

---

---

## Uganda and its forests

2% deforestation per year  
Drivers include agriculture,  
woodfuel and timber  
Highly decentralised

---

## Sector coordination in Uganda

---

Efforts made but, to date,  
not fully effective

## Lessons from Uganda

- Vertical coordination also a priority
- Coordination takes time and effort
- Forests are often not high priority for decision-makers
