### National Climate Policy Inventories

The Climate Policy Lab at The Fletcher School, Tufts University is pleased to provide comprehensive national climate policy inventories for the United States, China, India, and Ethiopia. These inventories allow observers to track each government's progress in designing, implementing, and enforcing national climate policies consistent with their international commitments under the Paris Agreement of the UN Framework Convention on Climate Change (UNFCCC) and the various agreements associated with the Montreal Protocol on Substances That Deplete the Ozone Layer.

There are two inventories for China. The first inventory is a national climate policy inventory, similar to those for the United States, India, and Ethiopia. The second is a deeper dive into the Chinese policies governing domestic and international finance.
