

Moving towards Article 6 implementation through capacity building and blending with climate finance

Event description:

The role of private and public climate finance for blending with credit sales revenues as well as international development of specific methodological tools for Article 6 implementation, is crucial to enhance capacity building for Article 6 in SIDS. The event presents the different tools, including Dominica's National Financing Vehicle as a pioneering example for SIDS financing and blending with Article 6 revenues, the South-South Article 6 capacity building on climate finance and the International Initiative for Development of Article 6 Methodology Tools (II-AMT).

Hosts:

Government of Dominica and University of Zurich

Climate Resilience
Execution Agency
for Dominica

University of
Zurich

Foundation for
Climate Protection and
Carbon Offset KliK
