

IPCC Side Event

Climate Science for Policy

Wednesday, 05 December 2018, 13:15–14:45, Room Wisla

The IPCC side event at COP24 is an opportunity for the IPCC and its host organizations WMO and UN Environment Programme to present their latest scientific products to support the climate policy and sustainable development agendas.

The IPCC will present the Special Report on Global Warming of 1.5 °C, the WMO will present the Greenhouse Gas Bulletin and Statement on the State of the Climate, and UN Environment will present the Emissions Gap Report.

This event will show how these products of the climate science community are complementary and mutually reinforcing, as well as underpinning the broader work programmes of each organization.

➤ Provisional Programme

❖ Opening and Welcome (15 min)

- Opening

Elena Manaenkova, WMO Deputy Secretary-General
Jian Liu, UN Environment Chief Scientist
Hoesung Lee, IPCC Chair

❖ Climate-related reports in a policy context
