Countries making a difference through gender-responsive climate change frameworks

Showcasing innovative
gender-responsive
climate change frameworks
developed through multi-stakeholder processes in
11 countries and regions around the world.

Wednesday, 5 December 2012
13h15 – 14h45

Side Event Room 4
Qatar National Convention Centre

change we can believe in

A water taxi network owned and -operated by women on the Nile that both reduces emissions and provides fast, reliable public transport in Cairo, a waste-to-wealth recycling project empowering women as green entrepreneurs in Kathmandu, women environmental whistleblowers on the coast of Liberia assisting government in the collection of meteorological data, acting as early-warning system for storms and reporting environmental offences, a carbon-footprint program run by women that at scale could be linked to the carbon market - innovative examples proposed by multi-stakeholder groups in Mozambique, Jordan, Egypt, Tanzania, Nepal, Haiti, Panama, Costa Rica, Liberia, the Arab League of States and the Central American Region.

Participants:

Rachel Kyte
Helen Clark
Lorena Aguilar
Julia Duncan-Cassell
Keshav Man Shakya
Anyaa Vohiri,
Achmad Al Qatarnet
Aira Kalela
