

Welcome

The Paris Agreement !

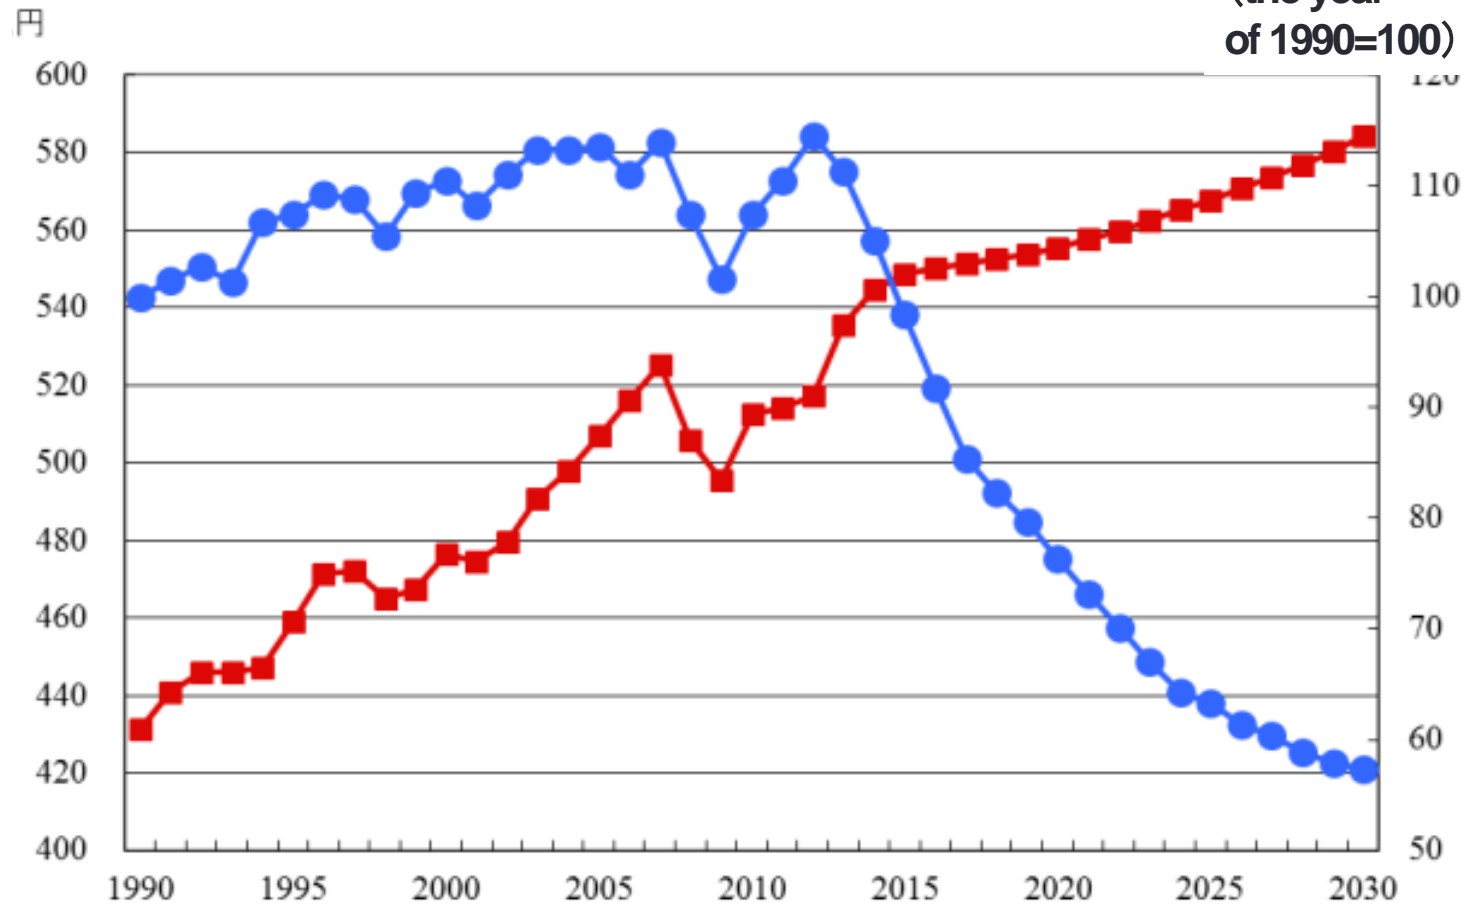

**Japan's -40% GHG Reduction
Target is Achievable
without Nuclear**

~CASA 2030 Model Simulation Results~

GDP and CO₂ emissions (No Nuclear)

GDP
(trillion
yen)

CO₂ emissions
(the year
of 1990=100)

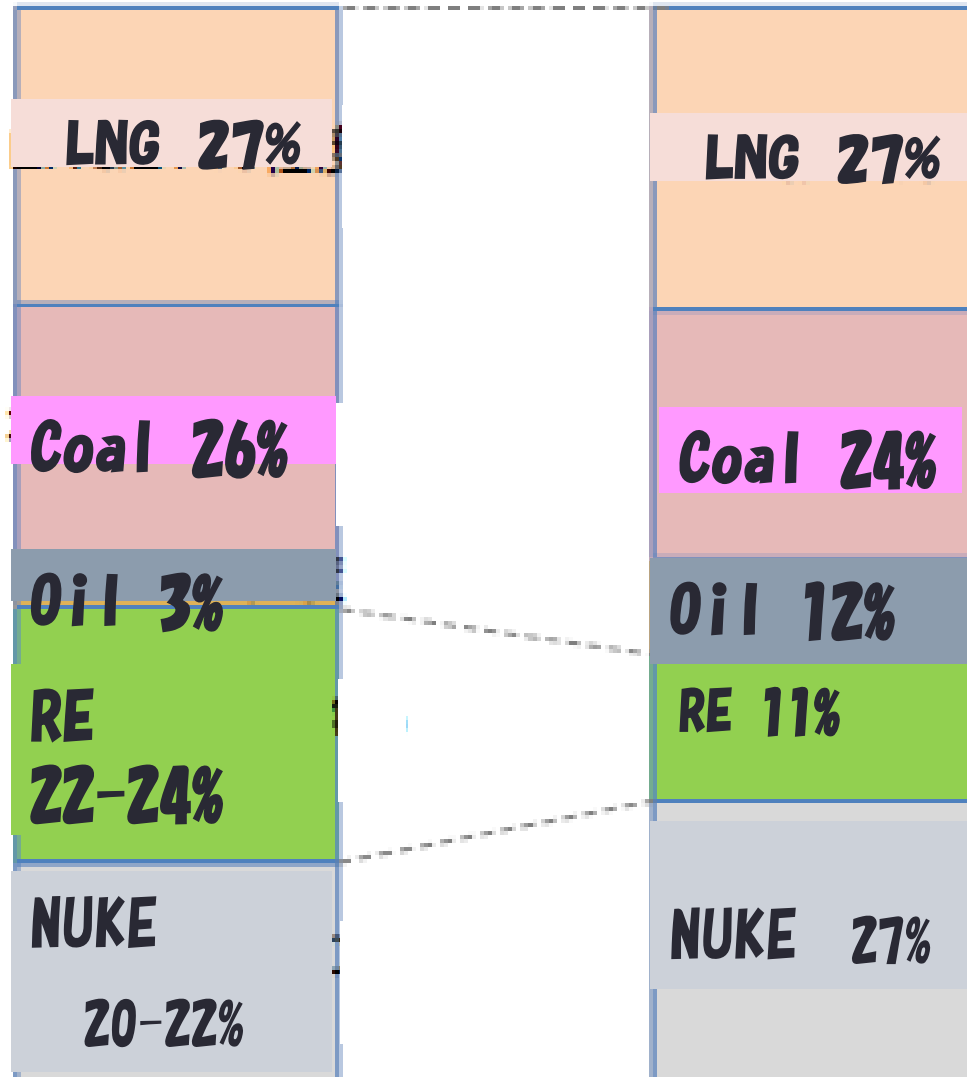

Decoupling of GDP growth and CO₂ emissions is possible

Energy MIX in 2030

In 2030

10-year average before Fukushima accident

Japan's Energy Policy Against the Paris Agreement

- **Nuclear and Coal are Base Load Power.**
- **Coal increases before FUKUSHIMA Accident.**
- **Wind and Solar are ONLY 13-15% in 2030.**
