

Capacity Building Experiences for Climate Change Adaptation

UNITAR Side Event
8 December 2008

Steven Were Omamo
Climate Change Coordinator

The United Nations World Food Programme

WFP fights hunger in the front lines of complex humanitarian crises

1- Responding to climate-related emergencies

2- Scaling up local and community-based projects to reduce vulnerability

3- Providing global public goods that take into account climate change risks on the most vulnerable

Strengthening vulnerability analysis and food security monitoring capacities

The examples of

- The Permanent Inter-State Committee for Drought Control in the Sahel (CILSS)
- The Southern Africa Development Community (SADC)
