

## CLIMATE-SMART AGRICULTURE FOR FOOD SECURITY

Organized by the Food and Agriculture Organization of the United Nations (FAO)  
and the CGIAR Research Program on Climate Change, Agriculture and Food Security (CCAFS).

Tackling the food security problem in an era of climate change calls for transition to a new paradigm of climate-smart agriculture: addressing together the three challenges of climate change adaptation, mitigation and food security. This side event will look at key examples of concrete country needs and good practices in climate-smart agriculture with potential for up-scaling.

### PROGRAMME

10 June 2011

WIND room, Ministry of Environment

- |             |  |
|-------------|--|
| 18:15-18:30 | Peter Holmgren<br>Food and Agriculture Organization of<br>the United Nations (FAO)     |
