

Does reducing emissions damage economic competitiveness?

**“We hope to develop a more economically secure supply chain
that is able to face the tough climate change challenges that lie ahead.”**

Walter Todd, VP of Operations for PepsiCo in the UK

**Friday 12th December
19.30 – 21.00, Aesculapian Snake**

Does reducing emissions damage economic competitiveness?

Through working with the CDP, corporations and public sector organisations are now asking their suppliers to report their emissions and climate change related risks and opportunities.

The smart companies and suppliers of tomorrow are beginning to understand that acting on climate change makes them more competitive in a changing world.

Measuring and reducing emissions through the global supply chain

Friday 12th December, 19.30 – 21.00

Aesculapian Snake

Tom Carnac, Head of CDP Public Procurement

Jim Stanway, Senior Director, Global Supplier Initiative, Wal-Mart (video contribution)

Andrew Jackson, Supply Chain Management Leader, Global Business Services, IBM

UK Department of Energy and Climate Change

Drinks and canapés will be provided
