Finland's path to carbon neutrality by 2035: Reducing carbon footprint, increasing handprint

Finland is committed to net zero emissions by 2035. How did we succeed in setting the target? In this event high-level speakers share insights on setting a strong net zero target. What are the key learnings from the Finnish experience in government-business collaboration? How to increase carbon handprint while reducing the footprint?

The event is organised by the Finnish Ministry of the Environment, Confederation of Finnish Industries, the Finnish Innovation Fund Sitra and Climate Leadership Coalition.
