

GlZ support projects on MRV and transparency

Side-event “Enhancing the preparedness of developing countries to implement MRV arrangements and the Enhanced Transparency Framework”

Katowice, 11 December 2018

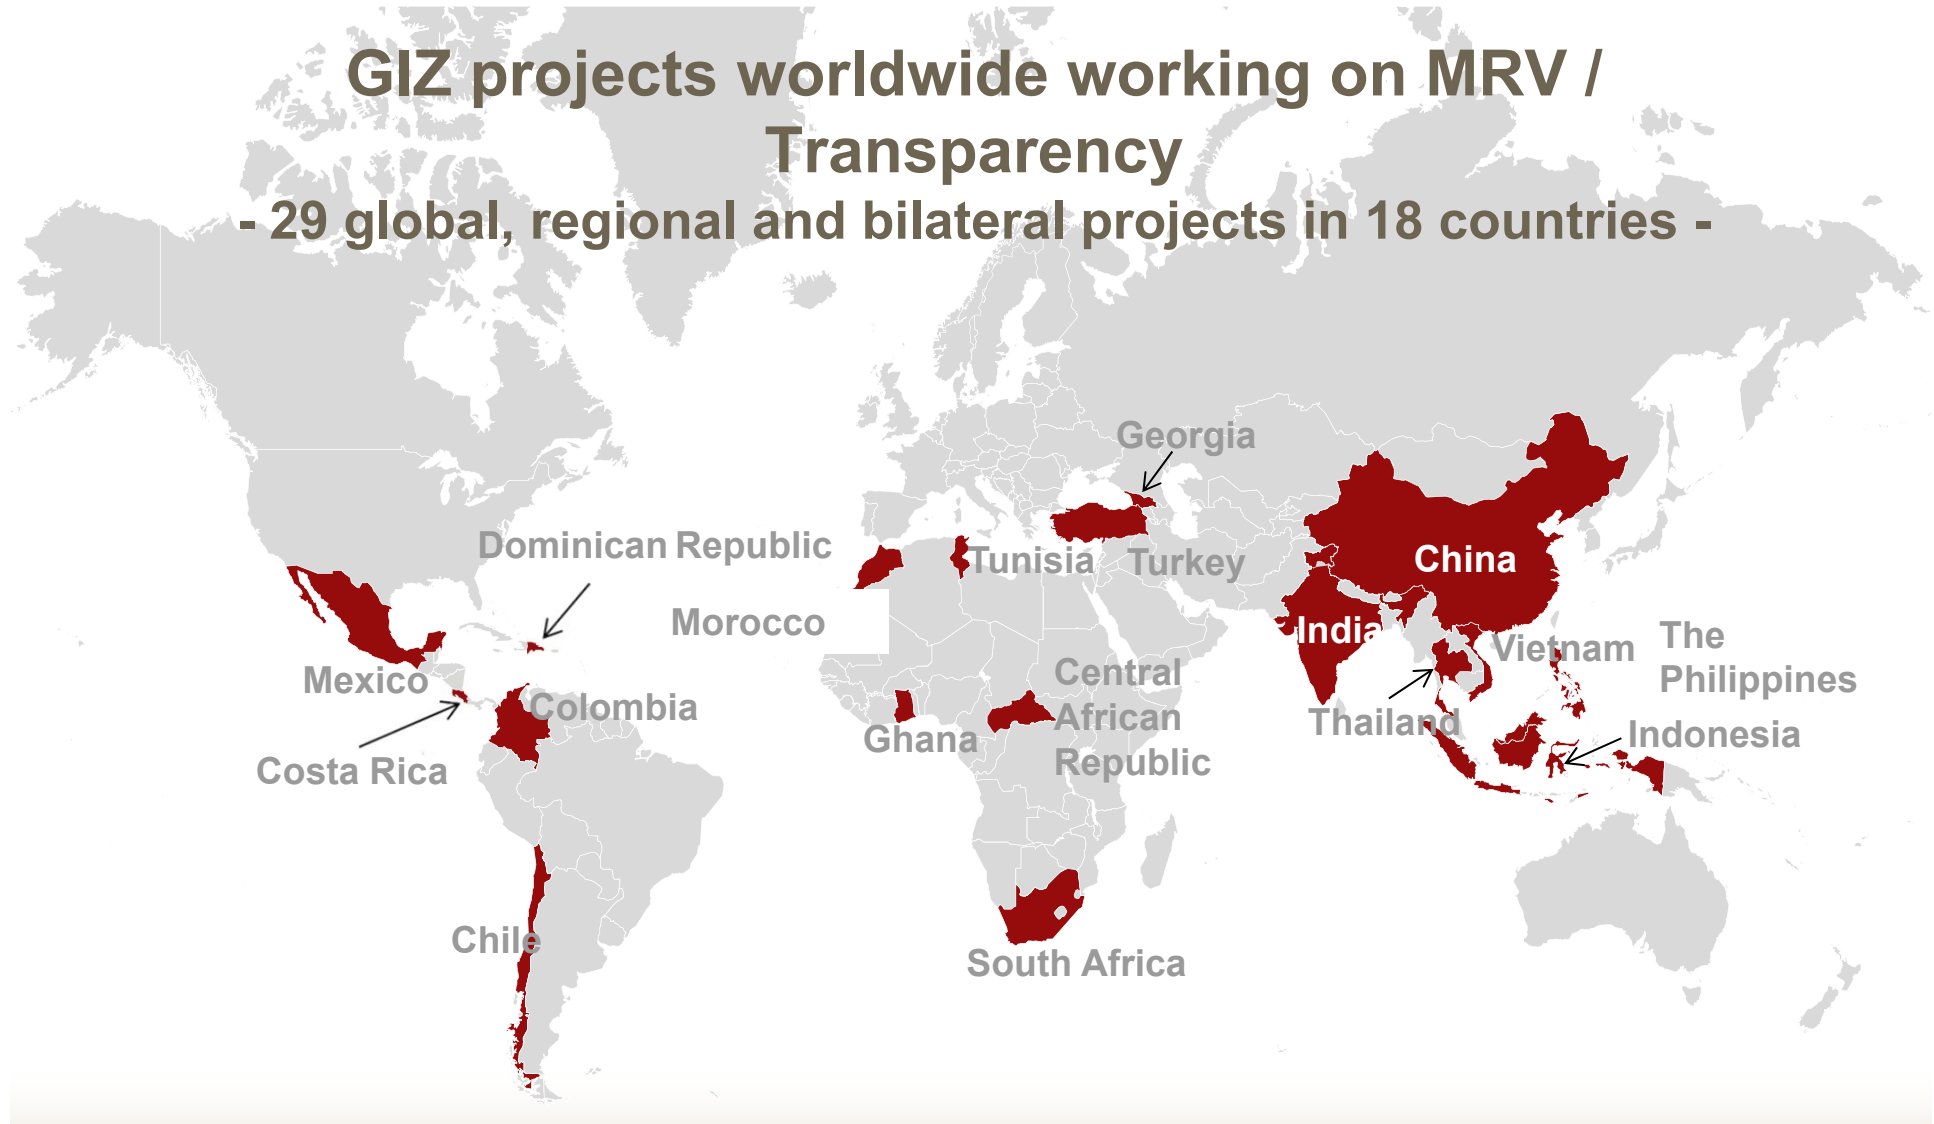

Oscar Zarzo, GlZ (oscar.zarzo@giz.de)

GIZ projects worldwide working on MRV / Transparency

- 29 global, regional and bilateral projects in 18 countries -

GIZ available tools and support options

NDC Helpdesk

<https://www.ndc-cluster.net/helpdesk>

- Easily accessible, short-term advice to developing countries to address challenges related to NDC implementation

Good Practice Database

<https://www.transparency-partnership.net/good-practice-database>

- Online database with case studies which demonstrate how climate policies and actions are being effectively designed and implemented across a range of national contexts

Information Matters

Transparency through Reporting

Provision of targeted in-country capacity-building support to developing countries through its flexible ad-hoc facility

Addresses needs with following focus:

- preparing **Biennial Update Reports**,
- establishing **sustainable MRV systems** and
- laying the **basis for future transparency requirements**

Trainings, guidance documents, studies:

Lessons Learnt / Success factors

- **Complementarity** of national and regional/global CB support
- **South –South experience exchange on good practices, Importance of language:** Partnership's regional groups
- **Impact evaluation:** operational criteria for success to be defined early
- **Need for coordination** among support programs & guidance for partners
- **Early integration of stakeholders** (line ministries, private sector, etc.)
- **Institutionalization** anchored in & mandated by **legislation/agreements**
- **Piecemeal implementation** approach, building on existing capacities
- **Tapping additional benefits of climate reporting**, such as improving national statistics, enhance cooperation with the private sector or improve access to climate finance
- **Sustainable MRV/Transparency** systems need national ownership and **additional national human and financial resources**
