

Nature-based adaptation to climate change in cities

The event will demonstrate how Nature-based solutions (NBS) can contribute to adaptation to climate change. At the same it will show how NBS will be affected in climate change conditions. The event will draw on the experience of practitioners, recent research and co-creation processes.

Thursday, 05 Dec 2019 16:45—18:15 Room 3

Presentations

- Best practice NBS in urban settings
Jonathan Müller; Helix Pflanzen
- NBS in climate change conditions – practical examples from Cities
María Máñez Costa; Climate Service Center Germany (GERICS), Helmholtz Center Geesthacht
- NBS for local climate adaptation under H2020 projects in Spain
Oscar Santa Coloma; Tecnalia

Moderation

Andreas Kress, Climate Alliance

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 73022
