

Understanding the political economy of REDD+ national processes

Monica Di Gregorio and Maria Brockhaus

Bonn, 16th May 2012

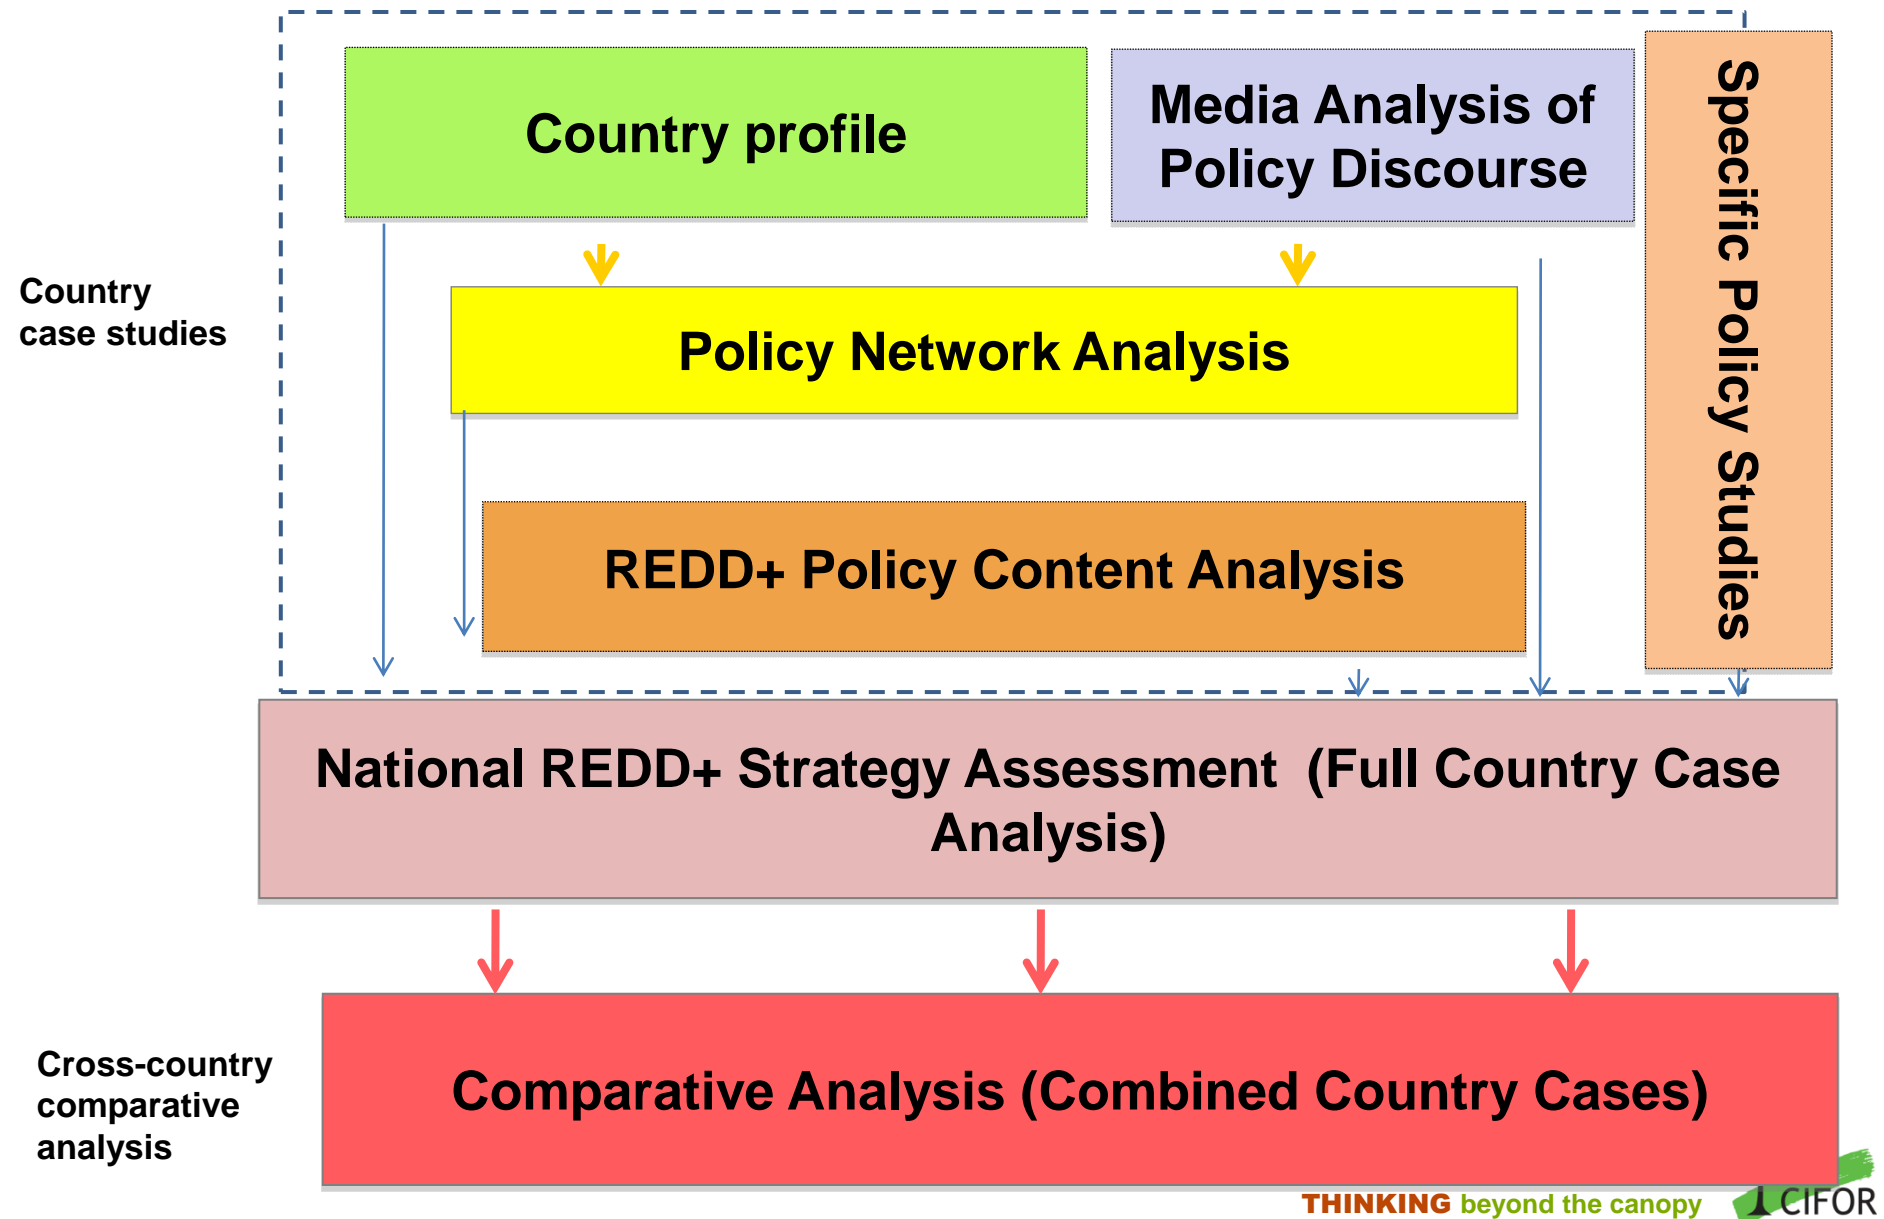

THINKING beyond the canopy

Analysis of national REDD+ policies and processes in 12 countries since 2009

Research Design

Political Economy Framework

Institutional and political path-dependencies

- Institutional arrangements (especially related to land use)
 - Past policies supporting or clashing with REDD+
 - Level of inclusion of political processes

Actors' interests

- Sectors driving D&D
- State: level of autonomy
- Civil society
- International actors

Actors' ideas

- Beliefs and ideology
- Development model

Policy process

Political coalitions, cooperation or contention
to move from:

Business as usual:

State capture by DD sectors
Low inclusiveness in policy processes
Int. actors dominate nat. policy processes
Business as usual dominant coalition

Shifts in economic incentives,
discursive practices and power
relations

Transformational change:

State autonomy from DD sectors
Inclusive policy processes
State leads policy processes
Transformational coalitions

Key findings context, policies & path-dependencies

- **Slow progress** in formulation of national REDD+ strategies
- National **policies facilitating D&D** reveal lack **of autonomy** of the state vis-à-vis business
- **Regime types** influence **level of inclusion** of REDD+ policy processes (Vietnam, Nepal etc)
- **Decentralization and recentralization** processes in forestry (RI, DRC..) affect **participation** in policy processes and **benefit-sharing**
- Historical path-dependencies (colonial and post-colonial) **affect land tenure** arrangements affect **benefit-sharing**
- **Weak governance** challenges most countries (mostly unrecognised by political elites) - **capture** by special interests

Key findings: policy actors shaping media discourse

- **State actors** dominate media and policy discourse in **Indonesia, Brazil, Vietnam** and **Bolivia**
- **International actors** dominate media and policy discourse in **Cameroon, Peru**
- **Civil society** (forest user associations) dominates media and policy discourse in **Nepal**

Key findings: media discourse analysis

- REDD+ media discourse reflects the stage of policy processes and actors interests
- Most state actors do not challenge institutional path-dependencies and policy constraints
- Business largely absent from the media and operates mainly behind the scenes
- Civil society is the main actor in transformational coalitions, but is isolated and weak
- Business as usual coalitions are dominant; coalitions for transformational change are minority coalitions

Overall findings

- Preconditions for overcoming politico-economic hurdles:
 - relative autonomy of state actors from key interests driving D&D
 - national ownership of REDD+ policy processes
 - inclusive REDD+ policy processes
 - presence of coalitions for transformational change
- Major challenges where international actors are the only force driving REDD+ policy processes
- Transformational coalitions need participation of both state elites and business actors

Overcoming challenges to achieve transformational policy change ...

AGENTS OF CHANGE

- robust policy coalitions for change to move beyond rhetoric

ANALYSIS

- tailored policy mix to respond to drivers of D&D needs
further quantification of sectoral contributions to D&D
(national and sub-national scale)

COORDINATION

- reviewed legislation and strengthen coordination of land-use policies

POLICY LEARNING

- established information flows and learning mechanisms that feed past experiences and pilot activities outcomes back into the policy process

Output so far...

Acknowledgements

This work is part of the policy component of CIFOR's global comparative study on REDD (GCS). The methods and guidelines used in this research component were designed by Maria Brockhaus, Monica Di Gregorio and Sheila Wertz-Kanounnikoff. Parts of the methodology are adapted from the research protocol for media and network analysis designed by COMPON ('Comparing Climate Change Policy Networks').

Case leaders: Thuy Thu Pham (Nepal), Thuy Thu Pham & Moira Moeliono (Vietnam), Daju Resosudarmo & Moira Moeliono (Indonesia), Andrea Babon (PNG), Peter Cronkleton (Bolivia), Mary Menton (Peru), Sven Wunder & Peter May (Brazil), Samuel Assembe & Jolien Schure (Cameroon), Samuel Assembe (DRC), Salla Rantala (Tanzania), Sheila Wertz-Kanounnikoff (Mozambique), Suwadu Sakho-Jimbira (Burkina Faso), Arild Angelsen (Norway). Special thanks to our national partners from REDES, CEDLA, Libelula and DAR, REPOA, UEM, CODELT, ICEL, ForestAction, CIEM, CERDA, Son La FD, UPNG, NRI-PNG, and UMB.
