## Reviewing Biennial Transparency Reports (BTRs): Achievements, Challenges and Lessons Learned

### Concept note

Date, time and venue: Friday, 20 June 2025, 13:30–14:45, Room: Bonn

#### Background

Under the Enhanced Transparency Framework (ETF), information submitted by Parties contained within the Biennial Transparency Reports (BTRs) shall undergo a Technical Expert Review (TER) in accordance with the modalities, procedures and guidelines for the transparency framework for action and support referred to in Article 13 of the Paris Agreement (MPGs). TERs help Parties to demonstrate action, identify areas of improvement and capacity-building needs, attract targeted support, and ultimately build trust. To improve the efficiency and effectiveness of BTR reviews, the secretariat is working closely with intergovernmental organizations.

As at 11 June 2025, 103 Parties have submitted their first BTRs and additional Parties are preparing to do so. In line with relevant decisions adopted by the CMA, the Transparency division of the UNFCCC secretariat implemented BTR reviews. By June 2025, 32 technical expert reviews of Parties' BTRs were conducted involving 225 technical experts from the UNFCCC roster of experts. The first BTR review rounds demonstrated broad participation from Parties and technical experts across all regions. In addition to the secretariat's review implementation update, Parties and experts will share their experiences and lessons learned from the completed reviews.

Considering the challenges of resource limitations and possibility for synergies, innovative approaches must be explored (such as collaboration with partners). These areas informed the design of the side event during SB62.

#### Objective

This event is threefold and will aim to provide Parties and other transparency stakeholders with:

1. Updates on the implementation of the TERs of BTRs<sup>1</sup>;
2. Perspectives from Parties and reviewers on experience and lessons learned on BTR reviews;
3. Perspectives of the climate community and potential collaboration with partners on BTR reviews (possible innovation in conducting BTR reviews).

---

<sup>1</sup> Including the technical analysis of technical annexes with REDD+ results, and simplified reviews of GHG inventories.
