

ISES – International Solar Energy Society

Who we are

The International Solar Energy Society, ISES, is a non-profit UN-accredited membership NGO founded in 1954. ISES represents a diverse membership of academics, researchers, energy practitioners, consultants, students, businesses and advocates in more than 110 countries. **Our vision is 100% renewable energy for all, used efficiently and wisely.** ISES works together with like-minded organizations from countries all around the world to advance the renewable energy transformation.

At ISES we work on several key areas to advance our mission:

- Congresses
- Publications
- Webinars
- Knowledge Sharing
- Education Initiatives

Learn more about ISES here: www.ises.org

ISES Conferences

- ISES organizes two major scientific congresses: the ISES Solar World Congress and EuroSun on bi-annual rotation
- Solar World Congress started in 1970, EuroSun started in 1996
- The congresses provide both a global and regional focus and 400+ participants and cover between 10-20 solar themes and topics

EuroSun2024

Please find more information here:
<https://www.ises.org/what-we-do/events>

ISES Webinars

- ISES started offering webinars in 2012 which now are a key activity for the society on a monthly basis
- Webinars are free to attend and attract up to 500 attendees every month
- Webinar panelists are distinguished experts from research, academia and industry who seek to provide informative, educational and accessible information about solar energy science, technologies and social and economic issues relevant to the renewable energy transformation
- Important cooperations with other organizations such as the IEA SHC Solar Academy Series, REN21, GWNET, GSC, and others
- A Q/A session provides an engaging forum for dialog between the speakers and participants

To view topics and information about past and upcoming webinars, visit:

ISES Publications: Journals

- ISES publishes the Solar Energy Journal since 1957 – it is the oldest and leading journal in the field, Impact Factor = 7.811 (2022)
- New addition in 2021: Solar Energy Advances (SEA), ISES fully open access journal

Please find more information here: <https://www.ises.org/what-we-do/publications>

ISES Knowledge Sharing: Infographics

- Free, easy to understand infographics on solar energy applications
- Dispelling myths about renewable energy and highlighting the potential of solar for example in day-to-day consumer goods such as electronics and beverages

Learn more here: <https://www.ises.org/what-we-do/dispelling-myths>

ISES Education Initiatives: InCoRE

International Cooperation in Higher Education on Renewable Energies

- ISES offers a range of education initiatives to students
- A new initiative on Higher Education, InCoRE, brings together students and mentors from around the globe
- Connect students and professors/teachers around the world to enhance global cooperation in higher education
- Support for students in the field of renewable energy on research projects
- The cooperation program seeks to strengthen global ties in the field of renewable energy research, promote international exchange and help provide students worldwide with up-to-date information about the scientific state of the art in their field of research

ISES Membership – Join ISES!

Be part of our global solar community

- ISES has members in more than 110 countries, and Global Partners in over 50 countries
- Young ISES Network: ISES connects students and young solar professionals worldwide
- ISES members have access to a wide range of benefits such as access to the publications, webinar archives, and a global network of like-minded individuals and institutions
- Individual Membership: Professionals and Students
- Corporate Membership: Companies and Institutions

Join ISES and share our vision of 100% renewable energy for all!
