Agricultural Sector
(LULUCF)**

**Programatic
CDM, Public and
Private**

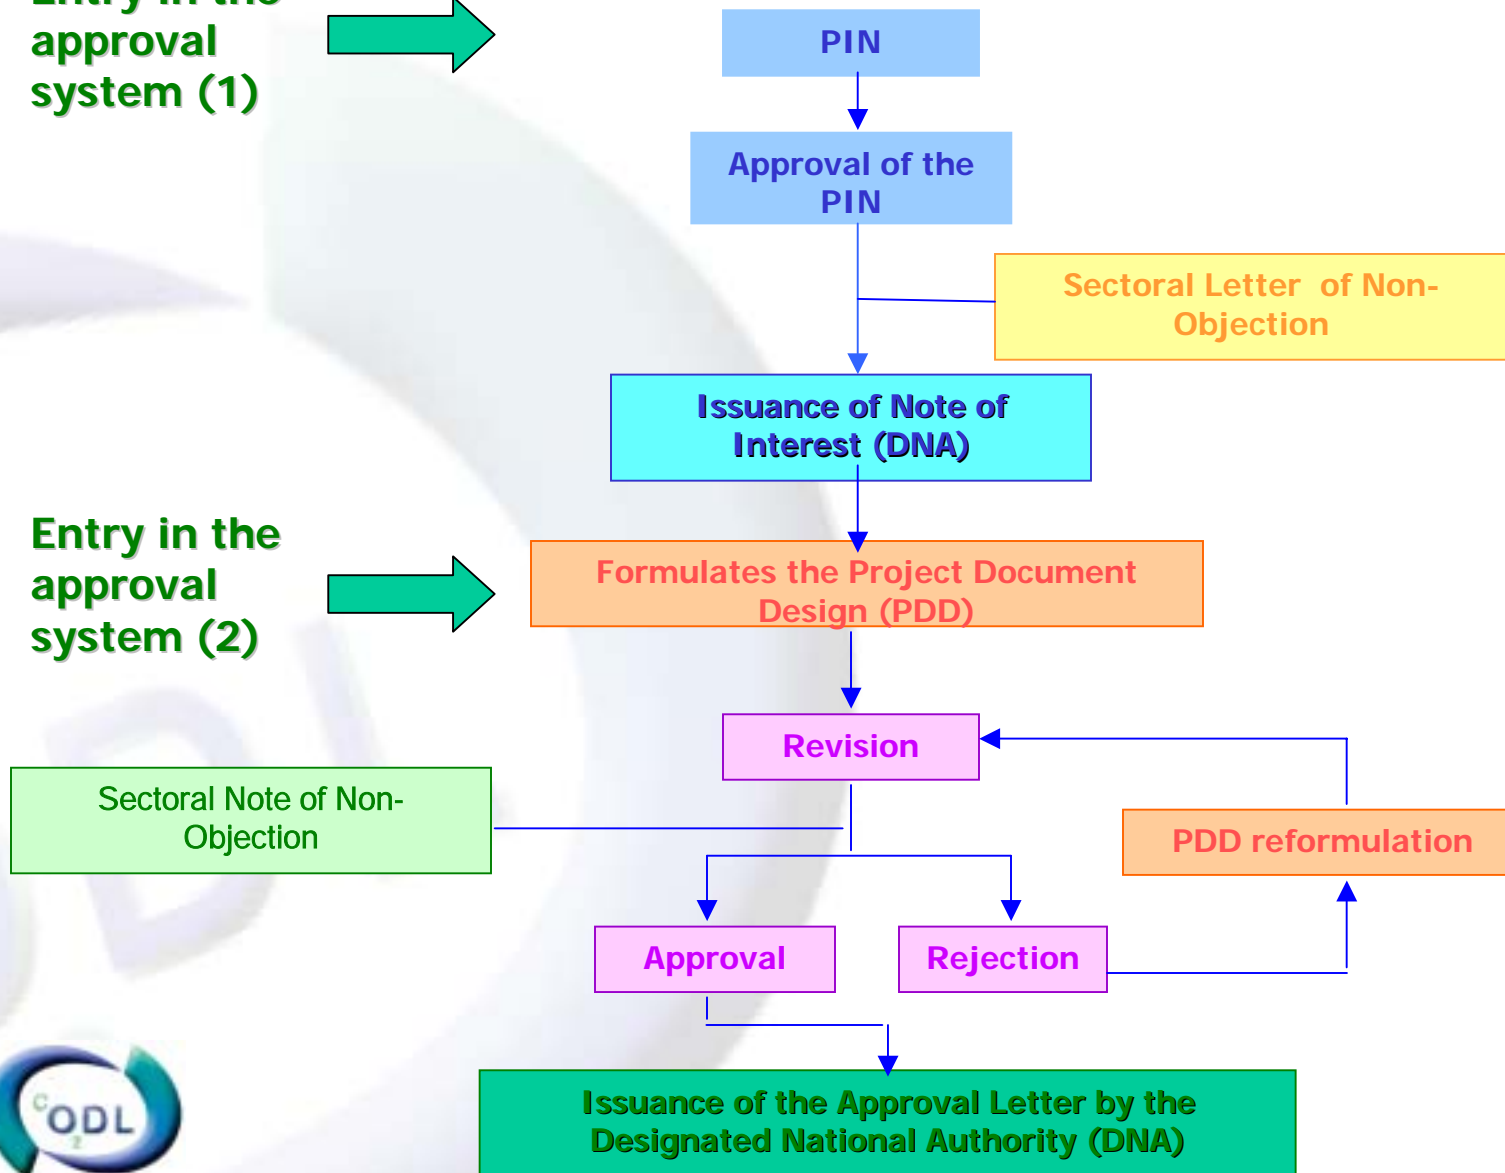

**Marketing, CERS
allocation area**

APPROVAL PROCEDURE

Entry in the
approval
system (1)

Entry in the
approval
system (2)

Challenges

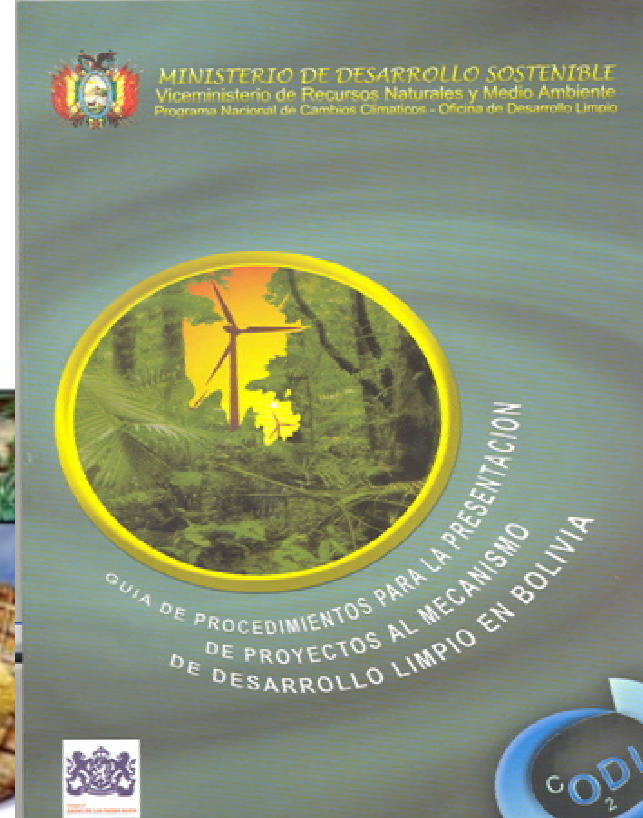

- Establishment of an efficient structure (support from the government)
- Funding for start up and operation
- Understanding the application of the Rules and procedures: Letter of approval, definition on the project participant
 - Interrelation with other actors in the mkt.
- Flexible and proactive
 - Provide info. and tools to PP to participate in a adequate way in the in each step of the CDM cycle

Progress in the LAC

- ANDs focusing more in regulation, leaving promotion activities to other actors (cluster is evolving)
- ANDs is also creating capacity (personnel), used by other actors in the mkt.
- More private sector participation, more local expertise used in PDD elaboration.. Etc.

New Challenges

- Programatic CDM window
 - Methodologies
- Capacity Building
- ITL, and how it works
- New methodologies and new activities
- Implement South South cooperation

CONCLUSIONS

- Capacity development is needed
- Funding for start up operations (New DNAs)
- Evaluate sustainability in terms of funding
- The focus (mix role) changes while the market evolves internally and externally
- Flexible and proactive
