Key Report Process | Ten Steps

1 Scoping

The outline is drafted and developed by experts nominated by governments and observer organizations.

2 Approval of Outline

The Panel approves the outline.

3 Nomination of Authors

Governments and observer organizations nominate experts as authors.

4 Selection of Authors

The Bureau selects authors.

5 Expert Review First Order Draft (FOD)

Authors prepare a first draft which is reviewed by experts.

6 Government and Expert Review Second Order Draft (SOD)

The second draft of the report and first draft of the Summary for Policymakers (SPM) are reviewed by governments and experts.

7 Final Draft Report and SPM

Authors prepare final draft of the report and SPM which are sent to governments.

8 Government Review of Final Draft SPM

Governments review the final draft in preparation for its approval.

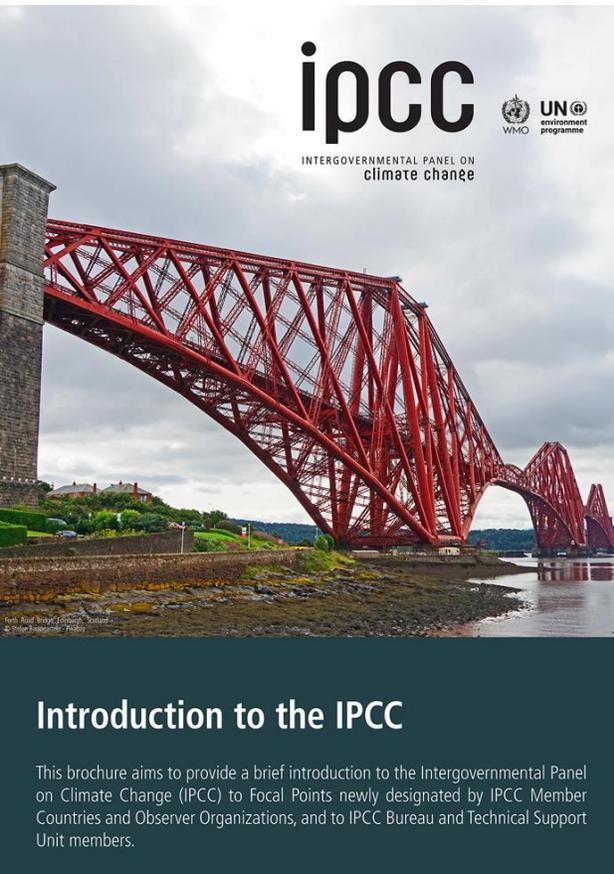

9 Approval & Acceptance of Report

Working Group/Panel approves SPM and accepts reports.

10 Publication of Report

From the Secretary of the IPCC

Dear Colleagues,
Welcome to the 20th issue of the IPCC newsletter covering January to March 2024.

It was an exciting and rewarding start to the year meeting with you all in Istanbul at the 60th Session of the IPCC - the inaugural Plenary of the seventh assessment cycle. I was proud to observe and be part of the collective efforts of governments, observer organizations, the newly elected Bureau Members, Technical Support Units, and our Secretariat, to develop the IPCC's program of work for the new cycle. We enjoyed excellent working conditions and exceptional hospitality in Istanbul. I would like to express my gratitude to our hosts, the Government of the Republic of Türkiye, for their impeccable organization.

Thanks to your hard work and the consensus reached in Istanbul, we can proceed to the next phase, the strategic planning, which will feature prominently in our agenda and discussions at the 61st Session of the IPCC. This Plenary is scheduled to take place from 26 July to 2 August 2024 and it is expected to be held in the Bulgarian capital Sofia. Discussions will also focus on the approval of the draft outlines of the first two reports in the seventh cycle - namely, the Special Report on Climate Change and Cities and the Methodology Report on Short-lived Climate Forcers. The Working Groups and Taskforce on National Greenhouse Gas Inventories have been busy with organization of the scoping meetings for these two reports and respective draft outlines. The Scoping Meeting for the Special Report on Climate Change and Cities will be held from 16 to 19 April 2024 in Riga, Latvia. The Scoping Meeting for the Methodology Report will be held in Brisbane, Australia from 26 to 28 February 2024.

To ensure the optimal participation of registered delegates in the Plenary, the Secretariat will organize a pre-briefing to the Session on 26 July, particularly for new delegates unfamiliar with the IPCC. On the same day, we are also offering training sessions for our Bureau Members on ethics and prevention of sexual harassment.

I am pleased to inform you that the work of the Ad-hoc Group on Lessons Learned (AGLL) has started. We thank the AGLL members, advisory members, Co-Chairs, Debra Roberts (South Africa) and Brittany Croll (USA), as well as the rapporteurs, IPCC Bureau members, Mark Howden and Cromwell Lukitoro, for their dedication to this important process. We will update you on their work in the next issue.

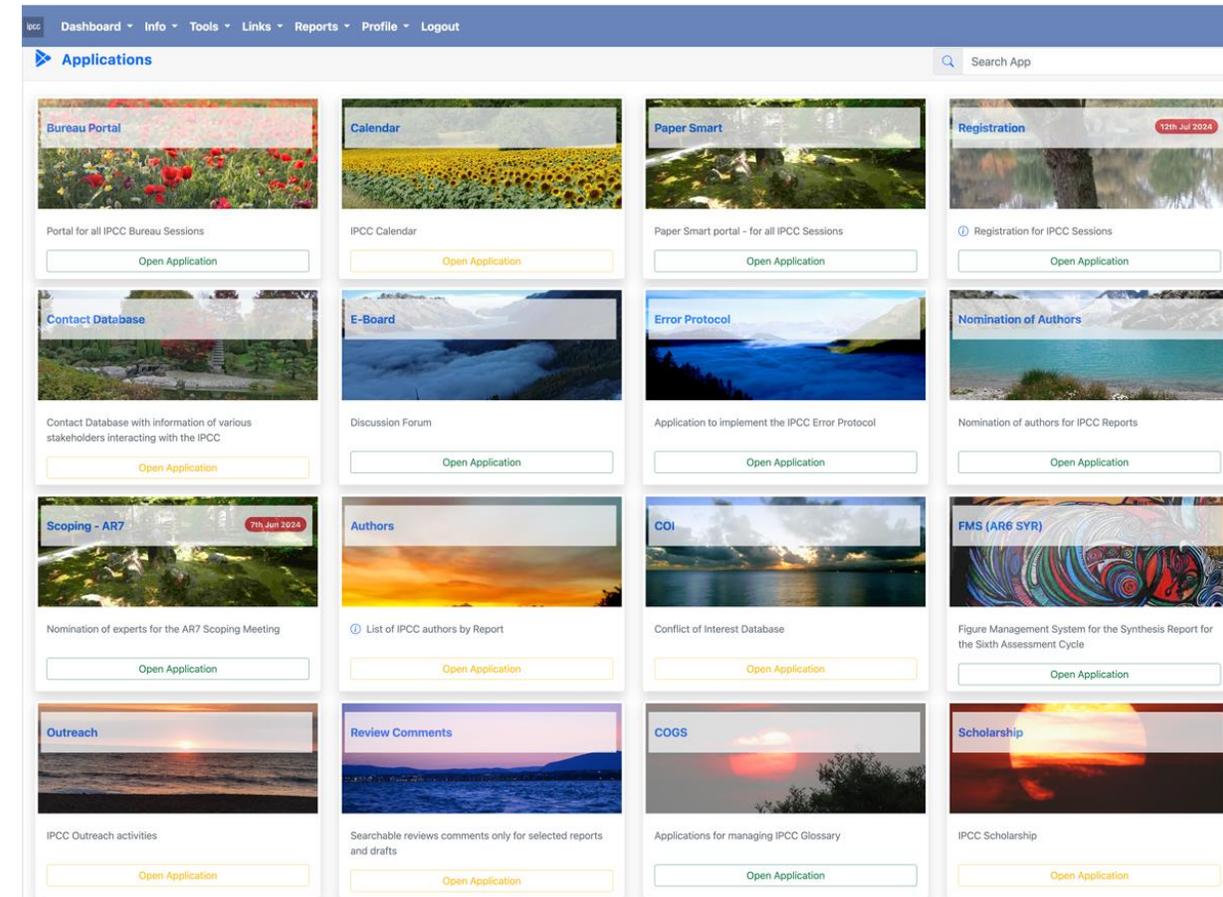

I am looking forward to welcoming the members of the Bureau at the end of May at the Headquarters of the World Meteorological Organization (WMO) as they will gather in Geneva to prepare for the 61st Session of the IPCC. This will be the Bureau's 67th Session.

With the new cycle now underway, the Technical Support Units are also bringing on board new colleagues needed for the work ahead. I wish to welcome the colleagues recruited so far to the IPCC family. Detailed information about new colleagues is available in their relevant sections below. The news and outreach section has links to the current vacancies.
