

UNFCCC SB48 – OFFICIAL SIDE EVENT

Mobilizing Mitigation Co- Benefits of Adaptation Through Agricultural Resilience & Renewable Energy

Friday 4th May 2018

18:30 – 20:00

Room Berlin

Dual land use of agriculture and solar or other renewable energy contributes to sustainability in both sectors. This supports adaptation and generates emission reductions at the same time. The side event of the UAE and the Fraunhofer Institute presents pilot projects and discusses the applicability of the concept in UAE and beyond.
