Jane Hupe, Chief of Environment Division, International Civil Aviation Organization

Miguel Palomares, Director, Marine Environment Division, International Maritime Organization

Dan Sperling, Head of the Institute for Transportation Studies at University of California at Davis

What GHG reduction opportunities are available for transport? What are the costs and benefits of these measures? Join our panel of high-level decision-makers and experts on December 15th to discuss these issues.

The International Transport Forum is an intergovernmental organisation representing 52 Transport Ministries around the world.
