

**Friday 30 November  
18:30-19:45**

**Qatar National Convention Centre  
Side Event Room 5**

## **COP-18 side event The expanding role of natural gas**

Join us for our seminar which will explore the expanding role of natural gas in energy supply and electricity generation, and the implications of a gradual shift from coal to gas.

The session will cover:

- Estimates for life cycle GHG emissions from gas production, transport and use
- Comparison to coal and alternatives
- Importance of carbon markets for phase-in of natural gas
- Energy industry perspectives on key projects and regional outlooks

The speakers will be available following the event to continue the discussion.

Food and drink will be provided.
