

Mapping and understanding mountains to achieve the 2030 Agenda

11 November 2016 at 13.15-14.45

UNFCCC COP22 - Pacific Room

The current development Agenda 2030 requires a better understanding of the effects of climate change among mountain communities and ecosystems. Further research, data collection and monitoring tools are needed to measure progress against the three SDG targets and promote investment. This event will share examples of ongoing activities, projects and programmes.

Time	Affiliation	Name and Title	Title of Intervention
13.15-13.25	FAO	Simon Rietbergen Senior Forestry Officer	Opening remarks and moderation
13.25-13.35	The Mountain Institute	Andrew Taber Executive Director	Mapping Mountains for the 2030 Agenda
13.35-13.45	Guinea	Ahmed Faya Traore Director of Climate Unit, Ministry of Environment, Waters and Forests	Climate change in mountains: The case of Guinea
13.45-13.55	Asociación Civil Oikos	Eric Chávez Betancourt Executive Director	The Vicuna Case: Clustering resilience, adaptation and mitigation in the Andes Mountains
13.55-14.05	UNDP/GEF Small Grants Programme	Charles Nyandiga Programme Advisor and Community Based Ad- aptation Coordinator	Indigenous Mountains Com- munity- based Adaptation to CC: Sharing the experiences of the GEF Small Grants
14.05-14.15	International Climate Initiative, Federal Minis- try for the Environment, Nature Conservation, Building and Nuclear Safety	Tilman Hertz Programme Officer	IKIs Ecosystem-based adapta- tion portfolio: some experi- ences and lessons learned from working in mountains
14.15-14.45	Discussion
