

# DEMILITARISATION FOR DECARBONISATION & CLIMATE FINANCE AND WHY ITS A FEMINIST ISSUE

**June 7 (Wednesday)**  
**4:15–5:30 PM CEST**

**BERLIN ROOM**

The impacts of militarisation are a significantly but largely ignored contributor to the climate crisis. To learn why militarisation poses a threat to the implementation of the Paris Agreement within the Global Stocktake, scan the QR code for a list of resources from the co-organisers of this event.

## Speakers:

**MARIA REYES**  
FFF MAPA

**NICK BUXTON**  
TRANSNATIONAL  
INSTITUTE

**DR. MARISA O. ENSOR**  
ENPAX - GEORGETOWN  
UNIVERSITY

**ELLIE KINNEY**  
CONFLICT &  
ENVIRONMENT  
OBSERVATORY

**SHEENA ANDERSON**  
CENTRE FOR FEMINIST  
FOREIGN POLICY

**EDWICK MADZIMURE**  
WILPF ZIMBABWE

**MICHELLE BENZING**  
ENVIRONMENT WORKING  
GROUP WILPF

## Moderator:

## Militarisation should be a key issue for the Global Stocktake

The impacts of militarisation are a significant but largely ignored contributor to the climate crisis. From weapons production, testing and trade to military bases, military exercises, war and conflict, military activity depends on excessive amounts of fossil fuels and destroys natural carbon sinks around the world. Ever increasing global military spending correlates with an increase in emissions, and redirects resources away from climate finance. In addition, the military is often deployed to sustain the very extractive industries that destabilise our climate. This climate chaos, in turn, leads to massive displacement, militarised borders, and the prospect of further conflict.

To learn more about the intricate links between conflict and military activity and the climate crisis, find a list of resources from the co-organisers and speakers by scanning the QR code.
