# EU Emissions Trading Scheme – Registries

*Olivia Hartridge*

*European Commission, DG Environment*

UNFCCC COP/MOP 1

Montreal, 1 Dec 2005

## Brief overview of EU ETS

---

- Operated in periods: 2005-07, 2008-12 etc.
- 11.500 installations
- Allocations set in advance for periods in NAP
- Allowances fully tradeable
- Allowances stored in MS electronic registry
- Verified emissions are also kept in the registry
- Surrender is done through the registry

## Community registries system

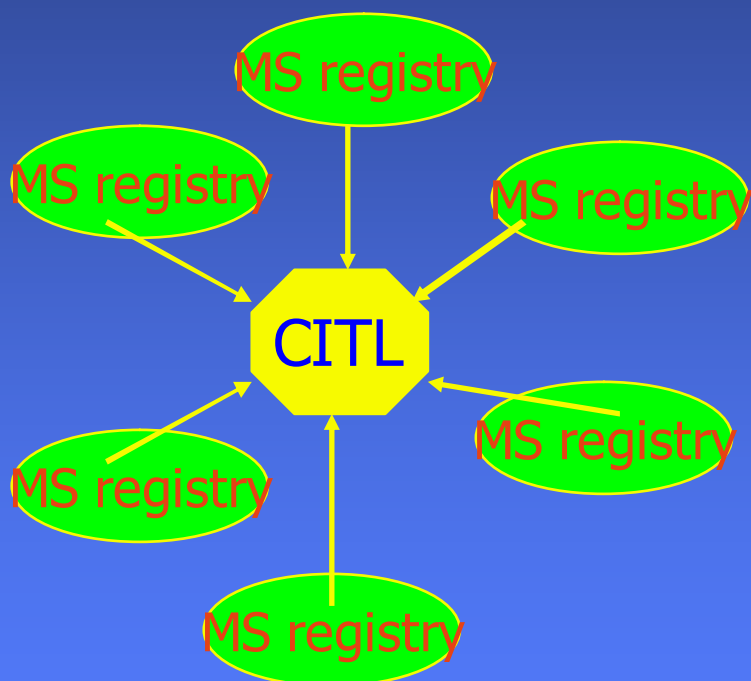

---

- **Kyoto system = national registries plus UNFCCC transaction log (ITL)**
- **Community system = national registries plus Community transaction log (CITL)**
- **National registries = registry under Kyoto Protocol incorporating registry under EU emissions trading scheme**
- **So only one registry holding all types of Kyoto units plus allowances**
- **UN and EU data exchange standards are fully compatible**

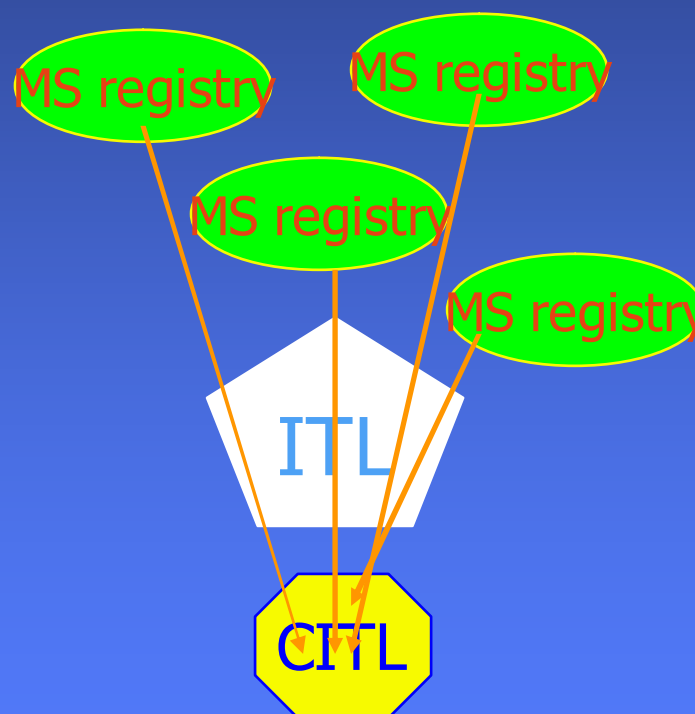

# CITL-ITL-Registries connections

Now

After launch of ITL

## What checks are done on transactions?

---

- **Communication hub check:** e.g. has message followed the correct format?
- **UNFCCC transaction log:** e.g. will external transfer breach the commitment period reserve?
- **Community transaction log:** e.g. is transferring account blocked due to non-submission of verified emissions report?

## Account structure

---

- Operator holding account (one per installation)
- Person holding account (for persons who are not operators)
- Party accounts (holding, retirement, cancellation, replacement)

## General facts

---

- **Availability: 24/7**
- **Public information is provided on verified emissions of installations and quantity of surrendered allowances**
- **Currently 17 registries are operational (PL, IT, HU, SK, LU, MY, CY, GR need to come online)**
