FUTURE CITIES AND VILLAGES FOR CCTs AND SDGs
ELECTRICAL CITIES AND AGROECOLOGICAL PARKS
RENEWABLE CITY

BIOCLIMATIC ASYMMETRICAL BUILDINGS AND CITIES
URBAN AGROECOLOGY PLANS

TAKING CARE OF ONE'S HEALTH WITH FOOD IN AFRICA.
THE FACTORY OF BAOBAB

GOALS

To make a contribution to the implementation of international programs like the UN FCCC. To define a strategy to restore the balance of critical urban systems and to achieve both the Sustainable Development Goals (SDGs) and Climate Change Targets (CCTs) over the next years. To provide solutions to technical, environmental, financial and social feasibility for the future development and well-being of urban settlements and for issues related to environment, energy, agroecology, mobility and infrastructure.

The Garden City, Ebenezer Howard
