

For a SDG on

Zero Net Land Degradation

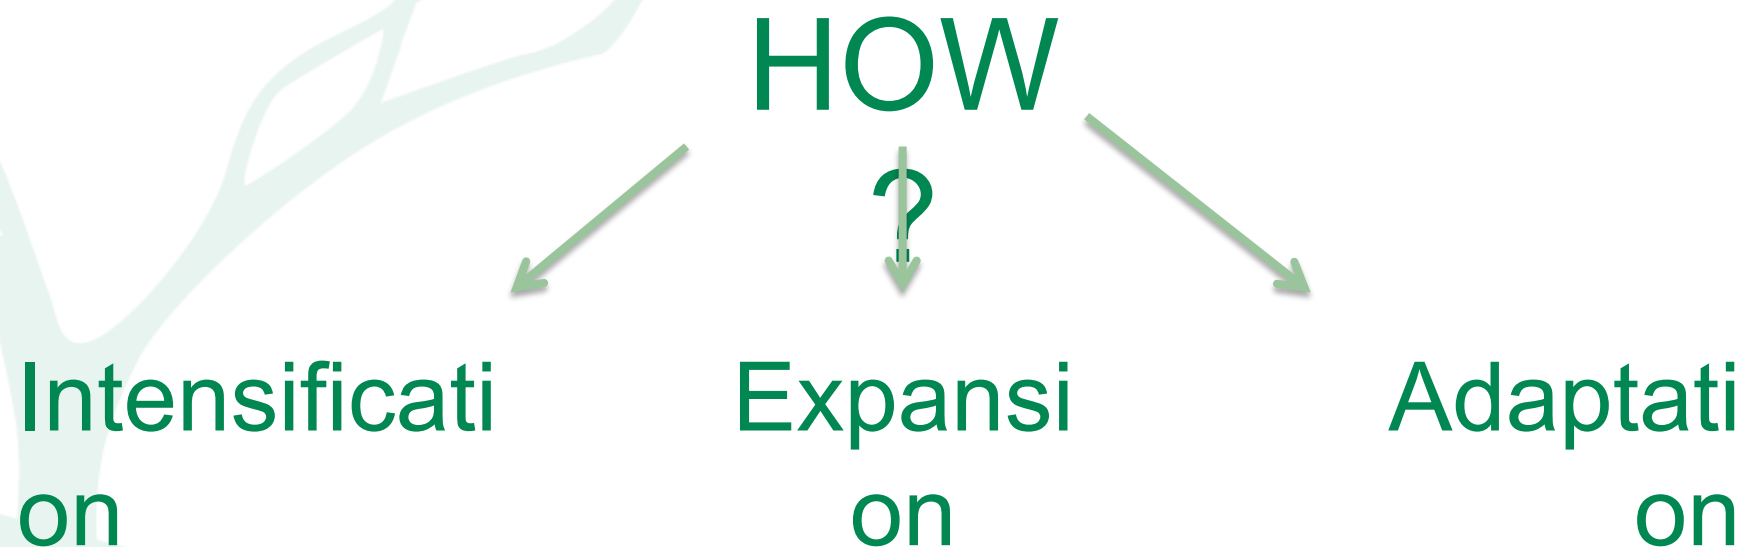

By

Sergio ZELAYA
UNCCD

United Nations Convention
to Combat Desertification

« By 2050 [...] food production must increase by 70% »

**75 billion tons of
fertile soil lost
every year**

SUSTAINABLE LAND MANAGEMENT

**Agro-ecological
intensification**

**Restoration of
degraded land**

**Adaptation to
climate change**

Zero Net Land Degradation:

The achievement of land degradation neutrality, whereby land degradation is either avoided or offset by land restoration

Land-degradation neutral world: Sustainable land use for all and by all

Target 1: Zero net land degradation by 2030

Target 2: Zero net forest degradation by 2030

Target 3: National drought preparedness policies implemented in all drought-prone countries by 2020

Ways to reach ZNLD :

- A stronger institutional framework
- A comprehensive assessment of the “Economics of Land Degradation”
- A global scientific authority
