

COP 24 UNFCCC Side Event
December 10, 2018
16:45 – 18:15
Room Narew
Zone G

Organizers: Earth Innovation Institute, Pronatura-Sur, GCF Task Force Secretariat

Title: Jurisdictional Sustainability Partnerships: Progress toward Low-Emission Development in the Tropics

Summary: Jurisdiction-wide LED-R strategies provide a framework for implementing REDD+ goals on the ground. We review a new global assessment of low-emission development in 40 sub-national jurisdictions, assessing progress to date and key challenges and opportunities. Global stakeholder networks representing governments, indigenous peoples, local communities and the private sector present innovative partnerships driving regional transitions to sustainability in the tropics. We explore multi-stakeholder processes, new policy initiatives, and innovative finance mechanisms that are enabling jurisdictional low-emission rural development in the tropics., among other interventions.

Format: One “context” presentation at beginning to frame the panel (7-10 min); One 65-minute panel discussion; 1 moderator + 7 panelists; panelists will respond to pre-selected discussion questions & topics, according to central themes, 15 mins audience questions

Presentation: “The State of Jurisdictional Sustainability”
Claudia Stickler, Scientist, Earth Innovation Institute

PANEL
