

# **Long Term Strategies:**

# Long-Term Strategies: How do global goals affect countries and sectors, and what opportunities exist?

## Side event at UNFCCC SB50

Tuesday 18<sup>th</sup> June, 18:30-20:00 Bonn Room, SB50 Venue (WCC Bonn)

#### **DRAFT AGENDA**

This event will prompt a discussion on the outstanding key policy decisions related to long-term strategies and the direct social and economic consequences of meeting the Paris long-term mitigation goals. The presentations and discussions will be based on the findings of the COMMIT and COP21 RIPPLES Europeanfunded projects, which aim to contribute to the understanding of pathways towards well below 2 °C and 1.5 °C, the enabling conditions and socio-economic consequences at sector-, country- and EU-levels.

There will be respondents from think tanks and NGOs to discuss how these scientific inputs can contribute to the ongoing policy debate.

18:30-18:40	Introduction to the event (Marta Torres Gunfaus, IDDRI)
18:40-19:20	Paths to Paris  The COP21 RIPPLES perspective (Michiel Schaeffer, Climate Analytics)  The COMMIT perspective (Heleen van Soest, PBL)
19:20-19:45	Approaches to governance  A sectoral perspective on strengthening international cooperation (Wolfgang Obergassel, Wuppertal Institute)  International cooperation from a Global South perspective (Britta Rennkamp, Energy Research Centre, University of Cape Town)
19:45-20:00	Discussions and wrap up

#### **About COP21 RIPPLES**

The COP21 RIPPLES project, "COP21: Results and Implications for Pathways and Policies for Low Emissions European Societies" aims to analyse the transformations in the energy systems, and in the wider economy, that are required in order to implement the Paris Agreement (NDCs), and investigate what steps are needed to attain deeper, more ambitious decarbonisation targets, as well as the socio-economic consequences that this transition will trigger.

### **About COMMIT**

The COMMIT research project aims to contribute to the analytical capacity to the global stocktaking process of the Paris Agreement to ensure fair evaluation of country policies and a good understanding of different outcomes and assumptions. It develops insights by discussing analyses of national and global low-carbon pathways among project partners and with policymakers.
