Global Sectoral Industry Approaches to Climate Change: The way forward

Panel discussion of a recent CEPS report Sectoral Industry Approaches to Climate Change¹

SBSTA, Bonn, 11 June 13-15H
Venue: MoE, Solar

Following the Major Economies Meeting in Paris in April this year, emerging economies have signalled their hesitation if not more, in pursuing the way of global sectoral agreements. Based on the latest findings of the of the CEPS report, this panel addresses the question whether sectoral approaches really are a realistic option in a global climate change agreement and if so, how such an approach could look like.

Programme
(120 minutes)
