

Enhancing ocean and climate observing in developing nations using low-cost technologies and capacity development

COP24

Katowice, Poland

Tuesday 4 December

16:45 - 18:15

Room: Narew

POGO and AOSED are both organisations working to develop/deploy low-cost technologies & provide capacity development for ocean & climate observing in coastal waters of developing nations. In this session, representatives will share their perspectives & experience. Stakeholders from these nations are invited to discuss their resource management needs.
