↘ Event details

The Voluntary Carbon Market (VCM) has grown dramatically in recent years, but the quality of some carbon credits has been questioned. While harmonized standards and close supervision increase market transparency, they may restrict innovation. How can we reconcile innovation, transparency and integrity through voluntary and regulatory interventions?

↘ Participation

Registered conference participants can join live in Dubai or via the [COP28 virtual platform](#).

The event will be available for watching live and on-demand on the [official secretariat-managed YouTube channel](#) and in the webcast section on the official UNFCCC website.
