ROLE OF MARKETS IN A POST 2012 FRAMEWORK

Monday, 9 June •Conference Ministry of Environment, SOLAR room

•13.00-15.00

Stimulate a business debate on the role of markets in a post 2012 framework. The Event will seek to stimulate debate and discussion from various industry representatives and policy-makers on how markets could evolve and shape the 2012 framework to address climate change risks in a world facing important and growing concerns regarding energy supply and use as well as how to adapt to the negative impacts of climate change. It will also examine key provisions of various carbon markets throughout the world and provide business views on opportunities and challenges.
