

Ensuring Clean Energy for Poor Households with Carbon Markets:

The Potential of CDM, Voluntary Markets and a Post-2012 Framework

The Clean Development Mechanism (CDM) has been unable to reduce the dependence of households in Least Developed Countries on traditional biomass resources for energy supply. In this side event, experts will discuss lessons learnt in Asia and Africa and how CDM and other markets can promote large up scaling of appropriate options.

SIDE EVENT

Saturday 12 December 2009

20:00—21:30 hrs.

Dan Turell Conference Room

In this event the following questions will be addressed:

- ▶ How can carbon markets bring more clean energy to the poor?
- ▶ Which markets suit best: CDM or voluntary markets?

Facilitator:

Dr. John Lovett, Professor University of Twente (The Netherlands)
Organised by SNV Netherlands Development Organisation and Practical Action

Event coordinator:

Mr. Jeroen van Bruggen, SNV adviser
