

# Resilient Nature

# Resilient People

*Preparing for Climate Change  
Through Nature-based Strategies*

## **Grand Hyatt, Solar Room**

## **Monday, 10 December 2007**

## **20:00 – 21:30**

### **A New Choice for Adaptation**

Learn and discuss how nature-based adaptation strategies can help coastal communities deal with climate change impacts by protecting marine environments and the benefits they provide – shoreline protection, erosion control, as well as food, jobs and income.

- Benefits for people and communities
- Cost effective and sustainable alternative for adaptation
- Solution to development challenges caused by climate change
