

# CHILE

## Ready for the Enhanced Transparency Framework?

Mastering BURs today, tracking  
NDCs tomorrow

Felipe Osses

International Negotiations Unit Coordinator  
Ministry for the Environment

Ministerio del  
Medio  
Ambiente

Gobierno de Chile

**giz** Deutsche Gesellschaft  
für Internationale  
Zusammenarbeit (GIZ) GmbH

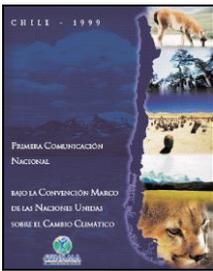

On behalf of:

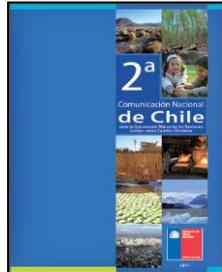

Federal Ministry for the  
Environment, Nature Conservation,  
Building and Nuclear Safety

of the Federal Republic of Germany

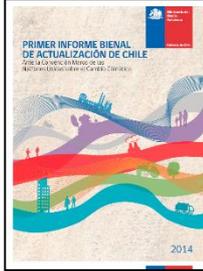

# Experiences with the current MRV framework: success stories

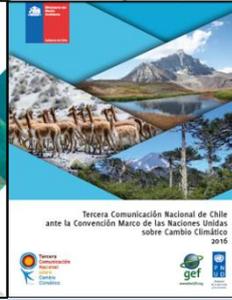

2000

2011

2014

2016

# Experiences with the current MRV framework: success stories

## Gradually improving

- A comprehensive national GHG inventory, time series available for 1990-2013
- A web-tool for GHG inventories analysis
- A regional GHG inventories network
- Three National Communications
- Two BURs, 2014 and 2016

# Experiences with the current MRV framework: challenges

## The usual suspects?

- Capacities and domestic coordination
- BUR guidelines: not specific enough?
- ICA: Feedback for improved reporting

# Enhancement of existing capacities and structures in national MRV systems

**A cross-government effort: informal, but effective!**

- Process led by the Ministry for Environment
- Bottom-up approach
- CC focal points
- Clear schedule / outcomes

# Benefits of a robust national reporting system:

## More and better information

- Evidence for policy making
- Effective buy-in from stakeholders
- Improved national statistics
  - Data at sub-national level
  - More transparency

# Way forward and challenges for the ETF

**Still a lot to do, but possible and worthwhile**

- Forward looking capacities
  - Modelling scenarios
  - Emission trends and trajectories
  - Impact assessment of climate action
- Strengthen institutional capacities
  - Sustainability
  - Communication efforts

# Thank you

**Mr. Felipe Osses**
