

Leveraging long term national emissions strategy

2009 12 10 Laura Dzelzytė Ministry
of Environment
Lithuania

Lithuanian carbon budget

long term and short-term greenhouse gas reduction goals
Strategic long-term trajectories to lower greenhouse gas emissions

strategic reconstruction of sectoral emissions management

Involvement of related governmental departments that should reform and construct their future strategies according to the set carbon reductions and plans

Plan for adaptation to climate change for most vulnerable parts

Main Responsible Institutions

- * **Parliament (Seimas)**– formulation of the state climate change policy
- * **Government** - state climate change management
- * **Ministry of Environment** – the main institution responsible for the organisation and coordination climate change policy development and implementation
- * **Ministries:** Agriculture, Economy, Energy, Finance, Health, Transport and Communications, Health, Foreign Affairs, etc. – participating institutions in sectoral climate change policy development and implementation
- * **Lithuanian Environmental Investment Fund** – GHG Registry management body

GHG EMISSION TRADING SYSTEM

- Current situation
 - Law on Financial Instruments for Climate Change Management
 - MoE order on allocation of GHG allowances and trading
 - MoE order on addendum IPPC rules
 - MoE orders on approval NAPs for years 2005-2007, 2008-2012
 - MoE order on approval new entrance reserve
 - Reestablishment of National GHG register (software and hardware) from departmental to the state
 - etc.

Climate Change Special Program (CCSP or GIS)

The sources of financing of the Programme:

- 1) the funds obtained from the sold of assigned amount units (AAUs);
- 2) the funds obtained from the allowances sold at auction;
- 3) the funds from fines for the illegal practices of carbon trading and emissions reporting;
- 4) the funds donated by natural and legal persons for implementation of the measures aimed at mitigation of climate change;

Administration

Ministry of Environment

The Lithuanian Environmental Investment Fund

The National Climate Change Committee

CCSP projects

- 1) energy efficiency in the energy, industry, construction, transportation, agriculture, waste management and other fields – at least 40 per cent;
- 2) promotion of the use of renewable energy resources, introduction of environment-friendly technologies, including efficient energy production by cogeneration – at least 40 per cent;
- 3) implementation of the plan of implementation measures of the National Strategy for Climate Change Management Policy;
- 4) reforestation and afforestation;
- 5) public procurement
- 6) adaptation
- 7) international climate change financial commitments

CCSP financial framework
