

Greening schools – building resilience in a changing climate

UNFCCC COP22 Side Event, November 11, 2016

Improving NDCs: Ecovillage Development, Energy Access, & Zero Carbon Societies in Africa, Asia & EU

Linda Kabaira – GEN Africa Zimbabwe –
linda.kabaira@gmail.com

We are not too young to be involved!

Our plants,
our
responsibility

SAVE WATER
SAVE LIFE AND
SAVE THE
WORLD

Water is Life, Every drop counts. Harvest Water, plant Water and recycle Water !!

What is calling us now?

- Increased risks of heat waves,
- droughts, floods,
- green house gases, which result in
 - food shortages, lessen air quality, diminish fresh water supply, increased diseases related to all this.
 - Increased bare landscapes
 - An educational curricula that is disconnected to the real issues

Bare landscapes

Drought and crop failure

Crop failure, patchy crop stand

a corpse of a cow

Poor soil fertility

Dried riverbed

Children and youth in action to adapt to climate change

Communities working together to solve food issues in schools

Results of our actions

February 2012

February 2014

Mtapika school

February 2012

February 2014

Musavezi Primary School

Food-growing schools

Mupumbu Primary school nursery

Seeds: taking charge of food choices

Children & educators prepare traditional dishes

Community children and youth celebrate the environment
