

The Innovation Center for Energy and Transportation EVENTS

Dec. 7th- 18th, 2009

At the COP15 United Nations Climate Change Conference in Copenhagen

The Innovation Center for Energy and Transportation, a policy center based in Beijing, China will be involved in the following events that will take place during the UN Climate Change Conference in Copenhagen from December 7th-18th, 2009.

08 Dec 18:15—19:45

Room: Dan Turell

Natural Resources Defense Council (NRDC)

China and the world: Solving climate change through practical, on-the-ground collaboration

China is seeking a lower-carbon development path through greater energy efficiency, development of renewable/low-carbon energy, and improved energy/environmental governance. Top US and Chinese experts analyze China's progress to date, challenges ahead, and the most important on-the-ground solutions. iCET's **Robert Earley** will be a panelist.

14-18 Dec

iCET Exhibit in the Bella Center

14 Dec 2009 16:30-17:00

iCET Press Conference

Room: Asger Jorn, Hall H of Bella Center

16 Dec 10:00-11:30

ROOM: MOUNT EVEREST 3

The Climate Registry

Bridging the Gap: Sub-National Collaboration between Developed and Developing Countries

Moderated by Margret Kim

National and international climate policies can take years to implement and become watered down by political considerations. Actions at a sub-national level have the opportunity both to occur faster, and also to address more localized problems and solutions. Speakers share exciting new initiatives (e.g., agreement between the US state of California and the Chinese Jiangsu province, R20, UNDP's Territorial Approach to Climate Change, a regional voluntary disclosure effort in Southern China) and discuss

US Office: City Place, Suite 2105, 210 N Hudson Ave. Pasadena, CA 91101

China Office: Rm 1904 e-Tower Building No.C12 Guanghua Rd., Chaoyang District Beijing, 100020,

+86 10.6585.7324 Fax: +86 10.6585.7394

www.iCET.org.cn or www.ChinaClimateRegistry.org

why accelerating such collaboration is key to achieving reductions. *iCET's* Dr. **Feng An** will be a panelist.

16 Dec 19:30 – 21:00

The Climate Registry

Adopt a GHG Registry: Don't Reinvent the Wheel!

Moderated by Robyn Camp, Vice President, The Climate Registry

With the rapid development of GHG registries worldwide, the global community runs closer and closer to the reality all want to avoid: creating a multitude of different GHG database systems that will confuse users, increase the reporting burden; mislead the public and cost too much. By building on global accounting standards, and taking advantage of existing tools and programs, we can work towards harmonized reporting and find economies of scale. Come and learn how your state, province, region, country or sector can benefit from partnering with The Climate Registry and Misys in developing a comprehensive, yet customizable GHG data system to meet all of your GHG voluntary or mandatory reporting programs' needs. *iCET's* **Lucia Green-Weiskel** will be a panelist.

18 Dec 13:00 -14:30

Innovation Center for Energy and Transportation

Panel discussion: The China Energy and Climate Registry

Room: Liva Weel

This panel will discuss GHG reduction mechanisms in China, specifically building GHG registries and the need for more transparency in the context of China's business community. The goal of the ECR is to produce reliable, consistent and verifiable information on energy consumption and GHG emissions. *iCET's* **Dr. Feng An, Dr. Yufu Cheng** and **Lucia Green-Weiskel** will be on the panel.
