Advancing sustainable development in  
developing and emerging economies

# GGGI at a Glance

Headquartered in Seoul, Republic of Korea, GGGI has 30 Members with operations in 30 countries

## Member Countries

Australia, Burkina Faso, Cambodia, Costa Rica, Denmark, Ethiopia, Fiji, Guyana, Hungary, Indonesia, Jordan, Kiribati, Republic of Korea, Lao PDR, Mexico, Mongolia, Norway, Papua New Guinea, Paraguay, Peru, Philippines, Qatar, Rwanda, Senegal, Thailand, Tonga, United Arab Emirates, United Kingdom, Vanuatu, Viet Nam

## Operations

Burkina Faso, Cambodia, China, Colombia, Costa Rica, Ethiopia, Fiji, Guyana, Hungary, India, Indonesia, Jordan, Kiribati, Lao PDR, Mexico, Mongolia, Morocco, Mozambique, Myanmar, Nepal, Papua New Guinea, Peru, Philippines, Rwanda, Senegal, Thailand, Uganda, United Arab Emirates, Vanuatu, Viet Nam

## Who We Are

The Global Green Growth Institute (GGGI) is a new international organization dedicated to developing and diffusing green growth.

### Leadership

- President of the Assembly and Chair of the Council – Mr. Ban Ki-moon
- Director-General – Dr. Frank Rijsberman

## Vision

GGGI is an interdisciplinary, multi-stakeholder organization driven by the needs of emerging and developing countries.

It was founded on the belief that economic growth and environmental sustainability are not merely compatible objectives; their integration is essential for the future of humankind.

## Mission

GGGI is dedicated to supporting developing and emerging countries in demonstrating new pathways to climate resilient and pro-poor economic growth that simultaneously targets transformational aspects of economic performance, social inclusion and environmental sustainability.

## What We Do

GGGI supports developing countries and emerging economies in mainstreaming green growth in their economic development plans through three complementary and integrated workstreams - Green Growth Planning & Implementation (GGP&I), Investment and Policy Solutions (IPSD), and Thought Leadership (TL).

### Green Growth Planning and Implementation (GGP&I)

Assisting developing and emerging countries in mainstreaming green growth in their economic development plans

GGP&I assists developing and emerging countries in mainstreaming green growth in their economic development plans. GGP&I teams are long-term embedded within government ministries of GGGI Member countries, providing on-the-ground support as well as trusted and objective advice to enable them to explore green growth opportunities, which are aligned with their development objectives. With 49 projects operating in 30 countries, GGGI provides a suite of green growth services for governments to green their current and/or future cities, energy systems, industries, infrastructure, and land and water resources. GGGI will continue to play a pivotal role in supporting countries to strengthen aspects of economic, environmental and social policies and priorities.

### Investment and Policy Solutions Division (IPSD)

Dedicated to producing cutting-edge, policy relevant knowledge products and services

Investment and Policy Solutions Division (IPSD) teams provide technical support in green investment, policy, and knowledge sharing and capacity building. The Green Investment Services (GIS) experts leverage public capital to mobilize private sector investment through developing bankable projects, financial products, and National Financing Vehicles (NFVs). The Policy Solutions experts provide policy and sectoral expertise, technical advice, assessments and knowledge inputs. IPSD teams help to address financial, policy, and knowledge gaps and challenges in GGGI Member countries, supporting them to green their investments to deliver inclusive, pro-poor green growth, as well as climate action.

### Thought Leadership (TL)

Delivering a compelling and rigorous evidence base that showcases impact through policy research, analysis, and data-driven tools and methodologies

Thought Leadership (TL) teams are responsible for delivering a compelling and rigorous evidence base that showcases impact through policy research, analysis, and data-driven tools and methodologies. TL works in all four thematic areas and with a reinforced focus on climate change to promote knowledge sharing, leverage international partnerships to expand impact (including jointly operating the Green Growth Knowledge Platform), implement GGGI's green growth index and assessment tools and advance the international discourse in green growth through GGGI's climate diplomacy program.
