

# FOOD POLICY & EQUITY

## Cattle, Soyanization, and Climate Change Brazil's Agricultural Revolution

- Explores whether Brazil can protect its forests, grasslands, and immense biodiversity and meet its own, and the world's, climate-change goals, even as it produces, consumes, and exports more meat products, milk, eggs, and soybeans.
- Download the paper and brief, and watch videos here: [brightergreen.org/brazil](http://brightergreen.org/brazil)
