

JOIN US AT COP 24. *The International Federation of Red Cross and Red Crescent Societies (IFRC), International Institute for Environment and Development (IIED) and Near East Foundation (NEF) would like to invite you to the following event:*

2050 Pathways for Resilience: What mechanisms deliver adaptation and resilience at scale for LDCs?

COP24 · KATOWICE 2018
UNITED NATIONS CLIMATE CHANGE CONFERENCE

Wednesday 12 December 2018

Time: 16:45 – 18:15

Room: Bug

As Least Developed Countries (LDCs) confront the impacts of climate change, consideration of a range of suitable adaptation and resilience building mechanisms and approaches is required. The new LDC initiative for effective adaptation and resilience (LIFE-AR), aims to develop an overarching LDC Vision for adapting towards a climate resilient future by 2050, informed by such innovative mechanisms to support implementation of the Vision. This side event invites expertise from the international community to discuss global experience and evidence on mechanisms — including devolved climate finance, forecast-based financing and financial aggregation enabling SME innovation — that have successfully built local and national institutions, collaboration, and capabilities to deliver climate resilience, followed by an open discussion of the opportunities and challenges for taking promising mechanisms to scale.

MODERATOR: **Donna Lagdameo**, Technical Adviser, Red Cross Red Crescent Climate Centre

SPEAKERS: *(in order)*

Keynote:

Gebru Jember Endalew, LDC Group Chair

Panelists:

- **Yacouba Dème**, Country Director of Near East Foundation / DCF Consortium
- **Stefanie Lux**, Coordinator Pilot Projects Forecast-based Financing, German Red Cross
- **Kara Siahaan**, Senior Officer, Forecast-based Financing, IFRC
- **Reginald Mapfumo**, Green Energy Project Manager, Hivos
- **Clare Shakya**, Director, Climate Change, IIED (TBC)
