

# Understanding REDD+ across the globe

CIFOR has investigated REDD+ across the globe for the last 7 years, and continues its **Global Comparative Study on REDD+** for another project phase. CIFOR will support deciders and practitioners with the knowledge and tools they need to achieve effective, efficient and equitable REDD+ results. After REDD+ has been endorsed in Warsaw and Paris, new and focused research is needed to understand REDD+ implementation, and what works and what doesn't under the various national circumstances. Comparative research can provide the needed insights.

Our research addresses the following topics, which are central to REDD+:

Please click the following research outputs to search further information and tools about REDD+
