Video: Titles & Description

- 1. The Climakers – A Farmers Driven Climate Change Agenda Towards the Sustainability of Food Systems:** Video released for the launch event of the first-ever climate action led by farmers, "[The Climakers. Farmers Driven Climate Change Agenda](#)", within the UNFCCC COP 24 Farmers' Day. It highlights the relevance of giving voice to the farmers and raising awareness on the solutions they are already implementing in the field to fight climate change while helping the shift towards sustainable and climate-resilient food systems.
 - 2. Farmers' vision on nature-based solutions:** Video contribution from Theo de Jager, President of the World Farmers' Organisation, released for "[Nature for Life Hub](#)" virtual event organised by UNDP, UNEP and Convention on Biological Diversity during the 75th UN General Assembly and the UN Climate Action Week.
 - 3. Farmers4FoodSystems: A Family Farmer from Cambodia:** Video released for the WFO communications campaign "[Farmers4FoodSystems](#)". A family farmer from the Cambodian Farmers Association Federation of Agricultural Producers (CFAP) tells the world how the net house is resilient to climate change. It can protect vegetables from heavy rain, storm, and high temperature. Moreover, it is safer for consumers as it can also protect against diseases and pests. The net house can also save water greatly for farmers in rural Cambodia.
 - 4. Farmers4FoodSystems: Györfy Balázs from Hungary:** Video released for the WFO communications campaign "[Farmers4FoodSystems](#)". Györfy Balázs, farmer and President of the Hungarian Chamber of Agriculture (NAK), tells why and how farmers are the greatest environmentalists globally, protecting our environment, restoring nature and enhancing biodiversity to leave a healthier planet to future generations.
 - 5. Farmers4FoodSystems: Shalini Seaton from Jamaica:** Video released for the WFO communications campaign "[Farmers4FoodSystems](#)". Shalini Seaton from Jamaica Network of Rural Women Producers tells the world how she contributes to sustainable food systems every day by optimizing the usage of her agricultural lands and through extensive research in upgrading and improving the quantity and the quality of the crops she produces.
