

# ***Strengthening multi-stakeholder participation to access finance and implement NDCs in Latin America***

**COP 24 Side event organized by Fundación Avina and Secretariat of Environment and Sustainable Development of Argentina**

Wednesday, December 12th  
6.30 to 8.00 PM  
Room Bug- Section G

A successful implementation of NDCs requires participation, articulation and engagement of different levels of governments and sectors. Furthermore, institutional arrangements, enabling conditions to leverage climate finance and capacities among stakeholders to implement successful climate action need to be in place.

Different initiatives are being led by Latin American governments to engage with sub-national governments, the private sector, academia and civil society, aiming to accelerate climate action and enhance direct access to climate finance. At this side event, on-going initiatives to make NDC implementation a reality through multi-stakeholder participation and access to finance will be shared. National governments will share experiences to mobilize climate finance and leverage opportunities for effective NDC implementation at multiple levels. Fundación Avina will present its work supporting NDCs implementation in the region.
